

BPOS: Migration, Co-existence and Continuity

SPARXENT'S XAWARE MAKES THE TRANSITION TO BPOS FAST AND PREDICATBLE

Cloud-based applications offer many benefits including economies of scale, reduced IT expenditure and universal access to corporate applications. Yet in most cases, companies are not ready to move all of their application data into the cloud at once. Instead, they need a stepped or phased approach to migrating applications and services. The transitional period, where companies are managing a blended IT application infrastructure, can present many unique challenges.

This is where Sparxent's XAware solutions come in. We know migrating to Microsoft's® Business Productivity Online Suite (BPOS) can be tricky, especially if you don't have a large, cloud-savvy staff with time to focus on the effort. With XAware services, you can focus on your core business, and let Sparxent's team of BPOS and data integration professionals migrate, synchronize, transition and manage the data between your on-premise and BPOS solutions.

BPOS BLENDED SOLUTIONS

- INFRASTRUCTURE ANALYSIS
- CLOUD READINESS ASSESSMENT
- DATA SERVICE DISCOVERY
- DATA SERVICE DEFINITION
- DATA SERVICE CREATION.
- TRANSITION PLANNING & EXECUTION
- MIGRATION PLANNING
- BPOS DATA SYCHRONIZATION
- DATA COEXISTANCE & CONTINUITY

Blended cloud and premise solutions for your business

DATA MIGRATION & SYNCHRONIZATION

Sparxent's XAware solution for BPOS transitions makes the move from on-premise to the cloud seamless and predictable. The XAware transition team will help you inventory, create, design and execute the required data services to transition your Microsoft Exchange, files servers and SharePoint® instances into the BPOS.

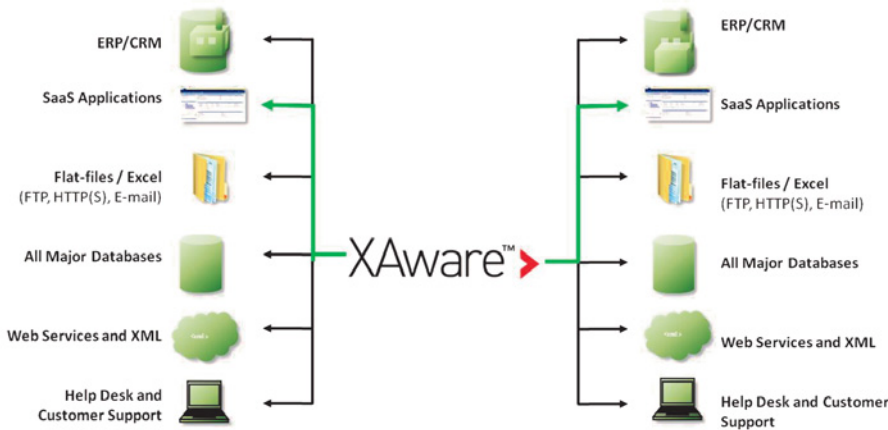

- Migrate your CRM system to Microsoft Online Dynamics CRM
- Migrate your premise SharePoint to BPOS
- Migrate your Exchange Public Folders and File Servers to BPOS
- Synchronize your data between multiple SharePoint instances

BPOS MANAGED SERVICES

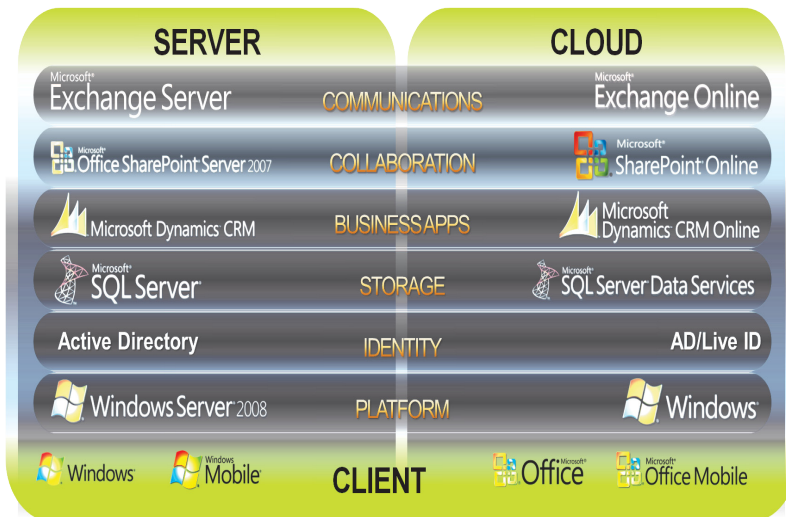

Sparxent's turnkey solution for managing your Microsoft applications in a blended premise-cloud environment allows you to focus on your core business. Data will be seamlessly integrated, synchronized and managed for you.

MOVING DATA FROM "APP TO APP"

The XAware solution can provide bi-directional data integration between many on-premise and web-based systems. Whether you are trying to migrate data from Salesforce to Microsoft Dynamics, or to move Exchange e-mail into BPOS SharePoint, XAware has the pre-configured App to App solution to meet your specific requirements.

- Connect to virtually any system or application
- Define data services to move between applications
- Transform and synchronize data across systems
- Move data from app to app and between premise and cloud
- Consolidate and normalize data across various systems.

CUSTOM SOLUTIONS

Sparxent's XAware data integration team can solve your most complex migration, transformation, synchronization and data transition challenges. Our team of experts can help you navigate the new premise-to-cloud and blended environments that define post-millennium computing. Contact us at sales@xaware.com to learn more.

CLOUD-ENABLED APPS

Are you exploring the possibility of moving applications, servers and databases into the cloud? Sparxent can help you. We work with you to develop a secure, cloud computing migration, co-existence and continuity plan that supports both SaaS and premised systems.

MOVE TO BPOS FASTER

Today, moving data into BPOS is a manual process and can take weeks. Expedite and secure your transition to the cloud with pre-defined XAware integration services. Learn how to get started by contacting us at info@xaware.com.
